

# CEYLON *Tea* GARDENS®

All of our tea comes directly from our own tea gardens to you. Our estate is located on the island of Sri Lanka (also known as Ceylon), renowned as the best location in the world to grow tea, due to the island's unique microclimatic conditions in the highland mountains.

## **100% Hand Plucked**

Every tea leaf is hand plucked, never by machine, to ensure only the most tender "two leaves and a bud" are plucked to obtain the best flavor profile.

## **100% Unblended**

Ceylon Tea Gardens® teas are 100% unblended, making them superior to blended teas due to their consistency in flavor, color and aroma.

## **Quality Assurance/Quality Control**

All of our teas pass a five stage QA/QC protocol with two stages receiving approval from independent third parties, the Ceylon Tea Board and SGS International.

## **Estate Direct**

Buying directly from the estate allows the best pricepoints and most consistent iced tea. As growers, we do not have price fluctuations or supply limitations, due to our 50 million pound annual production capacity.

## **Origin Certification (CT#)**

The Ceylon Tea Board issues a registration number to all estates that export tea from Sri Lanka. With this registration number, the tea can be tracked to the exact estate where it was grown. This makes Ceylon Tea Gardens® Iced Tea traceable directly to its origin.
